A NEW WAY TO COMMUNICATE

The Alcatel 9 Series takes you to a new dimension in audio experience, esthetics, communications productivity and customer care. This advanced range brings the award-winning power of the Alcatel OmniPCX communication servers - with their spectrum of advanced features - within even easier reach.

OUTSTANDING AUDIO

Alcatel 9 Series offers the best sound quality around. Its terminals have a hands-free speakerphone, including acoustic echo cancellation, and take listening comfort to new levels.

FUTURISTIC DESIGN AND OPTIMIZED ERGONOMICS

Their sleek, ultra-modern design, available in ice blue or urban gray, is itself hard to resist. But these phones don't just look the part - they are also conceived to ensure the simplest, most intuitive, access to a wealth of features.

INTUITIVE AND COMFORTABLE TO OPERATE

Alcatel 9 Series soft key functions couldn't be simpler to use, as they automatically change according to the call context, and are clearly displayed on the screen. Intuitive icons make using the system's sophisticated features as easy as 123, while the phones' high-resolution, adjustable graphical screens enhance comfort-of-use.

ALCATEL 9 SERIES

EVEN RICHER FEATURES

ALCATEL 9 SERIES

The Alcatel 9 Series of desktop phones comes with a wealth of features designed to improve your business communications:

■ AUDIO EXCELLENCE

The range has been designed to take the fuss out of communication, whatever the sound source. It enables smooth, automatic transfer from headset to hands-free for group listening without the need to remove the handset from its cradle. The Alcatel 4029 and 4039 terminals come with a built-in port for the use of a headset, additional speaker or teleconferencing system.

■ NAVIGATOR

The phone navigator feature makes the display more user-friendly by allowing you to scroll in up to four directions up. The navigator, along with the context-sensitive soft keys, provides easy access to the Alcatel system's many features.

■ MORE DEDICATED FUNCTION KEYS

At the push of a button, gain direct access to your mailbox or directory, or simply redial or ask the terminal for help. Audio control functions (loudspeaker volume control, hands-free audio control, mute etc.) are separate from the system's functional keys to facilitate easy and clear audio control for the user.

■ DISPLAY

The Alcatel 9 Series offers rich visual information on large, adjustable displays. These range from a one-line screen of 20 characters to an adjustable four-tone grayscale graphical display.

■ INTUITIVE ICONS AND SOFT KEYS

Determining the status of a call is simple with the help of easy-to-understand icons. The phones' dynamic soft keys change according to the call context, displaying call handling features in active communication mode. So you always get the right feature at your fingertips at the right time. Extra programmable keys are provided to further customize usage.

■ ALPHABETIC KEYBOARD

The Alcatel 4029 and 4039 terminals are equipped with an integrated alphabetic keyboard, exclusive to Alcatel, which provides easy access to the "call by name" function via the company directory and to messaging services.

■ 60-DEGREE FOOT-STAND

All terminals have an optional 60 degree foot-stand to minimize the footprint on your desk and optimize the display angle for comfortable viewing.

EVEN MORE OPEN AND FLEXIBLE

Fully adjustable display for a clear and comfortable viewing angle, from wherever you're looking.

■ FLASHING LED FOR VISUAL RINGING OR SYSTEM ALARM

The Alcatel 9 Series is designed to offer supremely practical terminals. We have added a special LED button which flashes green when the phone rings. Whether you are in a busy office where ringing noises merge or simply want to turn off the ringing tone, the LED button gives you more freedom, and can even be seen from behind the phone. It can also be programmed to flash red to signal a system alarm.

■ WHEREVER YOU LAY YOUR HAT,

THE ALCATEL 9 SERIES WILL FOLLOW

Taking your phone with you when you move offices couldn't be easier – simply take the set with you when you move or pass it from one employee to another. Functions and recorded data are retained, and your phone number stays the same.

■ SMALL IS BEAUTIFUL WITH ALCATEL 4019

This compact model provides all the necessary features for advanced telephony without the frills. These include a one-line, 20-character display; a bidirectional navigator for user-friendly scrolling; direct access to the company directory and mailbox; an external loudspeaker and 6 programmable keys.

■ SOFT GRIP HANDSET

The Alcatel 9 series phones are equipped with comfortable handsets built to the latest ergonomic design. The handset on the 4039 model comes complete with a built-in hearing aid for the hearing impaired and a newly developed soft grip material.

ip touch

MOVE ON UP TO IP TOUCH FOR INSTANT ACCESS
TO WEB-BASED APPLICATIONS

The IP equivalent of the Alcatel 9 Series, known as IP Touch, is an entirely new applications-based enterprise media, fully open to any application or service you can imagine, including those specifically tailored to your business. So much more than just a phone, IP Touch also doubles up as a hotel concierge, security agent, meeting room assistant... What can IP Touch be for you? Besides their ability to support any web-based business application, these state-of-the-art, converged Voice and Data terminals bring you optimized design; high-resolution, adjustable color or gray screens; superior listening quality and ring tones, plus the freedom and connectivity of *Bluetooth*® wireless technology.

FEATURE-RICH TERMINALS

EXTEND THE CAPABILITIES OF YOUR PHONE WITH ADD-ON MODULES

Grow with your 9 series phone. Add further functions and direct-dial keys. You can see at a glance if your colleagues' lines are busy. Choose the number of keys you need from three modules:

■ Ten additional keys. Commercial packs for the Alcatel 4029 and 4039 are available complete with this module.

■ A newly designed smart display module with 14 additional direct access buttons and a large LCD display, allowing for quick and easy "paperless" identification of associated buttons.

■ 40 extra keys, turning your phone into a switchboard, with direct access to all internal extensions and their current status (busy, free, etc.)

WITH A GREAT RANGE OF HEADSETS...
